PROFILE

Final-year Software Engineering student and Founder of DevZone with strong experience in backend development, Linux systems, and containerized deployments using Docker. Skilled in building scalable REST APIs, managing SQL databases, and deploying services in Linux environments. Expanding expertise in data analysis using Python (Pandas, Matplotlib), Power BI, SQL, and Excel. Interested in DevOps, infrastructure engineering, and cloud-native technologies.

PROFESSIONAL EXPERIENCE

DevZone <i>Founder & Full Stack Developer</i>	<i>Jan 2025 – Present</i>
- Designed and implemented backend services using Go (Gin) and Node.js (Express). - Containerized applications using Docker and deployed on Linux servers. - Built REST APIs and managed MySQL/PostgreSQL databases. - Designed system architecture and UML diagrams for scalable systems.	
Freelance <i>Backend Developer</i>	<i>Feb 2024 – Present</i>
- Developed backend services using Python (Django) and JavaScript for various clients. - Designed optimized SQL queries and integrated frontend with backend systems. - Assisted in debugging and maintaining production environments.	
Extensya <i>Talent Support Agent</i>	<i>Oct 2025 – Nov 2025</i>
Provided operational and technical system support using internal platforms.	
Extensya <i>Call Center Representative</i>	<i>Sep 2025 – Oct 2025</i>
Delivered structured customer support and issue resolution.	

EDUCATION

Amman Arab University <i>Bachelor of Science in Software Engineering</i>	<i>2024 – Present</i>
